

## **RHODE ISLAND - The State Tier of Funding**

Reported spending varies by source due to differences in methodology. The Trust for Public Land's Conservation Almanac is constantly being updated with newer data; please consult Andrew duMoulin for the most recent data: [Andrew.duMoulin@tpl.org](mailto:Andrew.duMoulin@tpl.org)

**Public Drinking Water Protection Program**

Administered by Water Resources Board, but funds appear to come from participating water supplier companies.  
One cent collected per hundred gallons of water delivered, funds set aside for acquisition or water quality improvement projects.  
No electronic data for this program; inactive since 2009 (according to TPL).

**Farmland Spending Specifically**

**Annual PACE Activity in Rhode Island, 2004-2013, American Farmland Trust**

Data from Jennifer Dempsey, American Farmland Trust

Note that much of the funding for farmland conservation comes from the open space bonds and is presumably included in state totals; these numbers should not be double-counted.
